

T Level in Tree & Woodland Management & Maintenance (Forestry)

T Level Level 3

STUDY MODE
Full time

LOCATION
Moulton

LEVEL
Level 3

START DATE
Sept 2024

DURATION
2 years

The forestry T Level is an excellent grounding in the requirements for working in the sector. You will acquire both the theoretical knowledge and the practical skills and behaviours to gain employment or go on to Higher Education. Please note that you must be aged 16 - 18 years old when you start a T Level qualification.

What will I learn on the course?

The Forestry Specialism encompasses aspects from ground preparation, planting and aftercare, growing trees for commercial, social and biodiversity. The practical skills gained will be among machinery and ground based chainsaw practice.

You will gain knowledge, skills and behaviours that will give you occupational competencies so that you are ready for the industry, from plant biology through to how to setup and run your own business!

Alongside your studies you will also need to complete a minimum of 315 hours of industry placement across the two year program.

What does a typical week look like?

The course is likely to be run over a four day week basis. This will include a full day's practical and then three days theoretical. There will be guest speakers, visits, demonstrations and a field trip at the end of your second year.

How will I be assessed?

Assessment for this T Level will be through a combination of exams, set-projects and gathering evidence for your portfolio. The portfolio will cover both practical observation/ professional discussion and some theoretical elements.

Where can it lead to?

The Forestry T Level will enable you to enter the industry with the occupational competencies required to be a confident professional as a Forest Craftsperson, working towards a supervisory role.

Successful completion of the T Level will gain you UCAS points which can be used to gain entry into Higher Education or a Higher Apprenticeship (Level 4 or Level 6). Ultimately you will be looking at careers such as a Forest Manager.

What are the entry requirements for this course?

You will need five GCSEs at grade 4 or above, including English, maths and a science. There will be an interview for entry on to the T Level which will include an interview with your Industry Placement.

Good to know

T Levels are brand new qualifications that are equivalent to three A-Levels. We will support you to find a suitable company to complete your industry placement.

Specific details of the structure of the course and study mode are subject to change as we finalise the details of the new course with the Awarding Body.

How will this course help me to understand environmental and sustainability issues?

As with all of our courses in arboriculture and/or forestry sustainability is at the core of the industry and therefore our teaching must reflect this. Social, economic and environmental factors are central to woodland and tree management, known as the three pillars of forestry, these have sustainability at the core to ensure that we have trees, woodlands and forests for the future.
